## WHAT DO WE DO APART FROM PPC PROGRAM?

Bots in crypto trading are specially designed programs that help to trade on your behalf. They automatically analyze and study the information about the currencies and interpret the market process. These bots possess the ability to collect market data, read and analyze them, calculate the market risks and finally purchase the currencies on behalf of the customer. You can set the purchase depending on the market price. Once the money touches the market price, these bots will automatically purchase the target assets. Bots in crypto trading are more effective than hired human experts. They work based on AI and are entirely knowledgeable about the crypto market. BOTS are able to generate 1% to 10% profit on a daily basis.
